Figma

EXPERIENCE

AirPack

📍 Bangkok, TH

- Backend developer for AirPack. Developed a RESTful API with Node, Express, MongoDB using an MVC architecture.
- Developed authorization/authentication for Airpack API to allow users to sign in, using JWT.
- Created middleware to handle different routes/roles using Express/Mongoose.
- AirPack is an upcoming app that allows users to purchase 'Airpacks', which are packs of travel essentials they can order while traveling.

Speakit-Live

📍 Tokyo, JP

- Co-developer in creating a web application that allowed foreign students to improve their English speaking abilities through improvised timed conversation while giving real-time feedback, and allowing for students to capture, and save audio for reflective homework assignments.
- Created as the final project in Le Wagon coding bootcamp using Ruby on Rails, CSS, HTML, and PostgreSQL.

Luna

📍 Austin, Texas

- Front-end developer in creating an E-commerce web platform selling different hair care products.
- Developed web pages based on the client's design specifications.
